## Why us?

Currently covering the South East of England, Kitchens with Rosemary Shrager creates affordable and functional kitchen spaces designed with you, for you.

As a teenager, Rosemary studied interior design and worked for architects in London and her passion for many years has been to be part of a kitchen design & installation venture of her own.

As a talented and versatile self-taught Chef, Rosemary knows her way around the kitchen and knows the importance of how that kitchen space works for you and your family and how the kitchen fits into your house, space and life.

Her ambition is to create amazing kitchens that are totally accessible to everybody and that will be functional and ergonomically designed. Within the design of her own kitchen, Rosemary incorporates loved items she has had in the family for many years including a piece of Georgian marble she collected from a bathroom over 40 years ago! The marble has been lovingly adapted to create a side table using the same units as the kitchen and it blends in perfectly. She wants others to be able to benefit from this experience and incorporate valued family items within their kitchen design to create that truly eclectic look that is totally personal to you!

# Finishing touches..

As you will all know Rosemary loves her gadgets. It's important that everything within the kitchen has its place and purpose. We can incorporate any gadget to your kitchen that you feel will make your life easier. We can also make suggestions as to what we feel would help you on a daily basis. We only incorporate things into your kitchen that we know you will use and will help make your life a whole lot easier. Rosemary's favourite gadgets are her Vacuum sealer hidden within a drawer under cooker and her hot tap and of course all of her Kitchen Aid appliances just to mention a few!
